Art Unit: 3653

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-3 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 7-9*** of copending Application No. 10/312,072, now Publication no. 2003/0162598 A1***. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented. Note in MPEP 800-17, the application of this provisional double patenting rejection, where there is the same invention and at least one common inventor, and there are conflicting claims between an application and a published application.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-3 are rejected under 35 U.S.C. 102(*a**) as being clearly anticipated*** by Eckardt Jr et al (publication no 2003/0162598). See again the guidelines noted in MPEP 800-17 above regarding this rejection. The 'others' that would have known of the

invention would be Eckhardt Sr. and Roche in the publication that are not mentioned as inventors in the present application.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(f) he did not himself invent the subject matter sought to be patented.

6. Claims 1-3 rejected under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter. See again the guidelines noted in MPEP 800-17 above regarding this rejection. **In regard to this, the other inventors mentioned in Publication no. 2003/0162598 to Eckhart Sr, and Roche could have also invented the subject matter if the present invention.*

7. Smith is cited disclosing I figure 3 the hopper with sloping sides 44 and rods 90 to prevent jamming of the balls.
